## Equal Positions in 100 Blue Chip Companies for Better Risk/Return Potential

A rules-based strategy designed to exploit market inefficiencies in a disciplined, systematic manner.

### Reduces market cap bias

Equal weighted positions avoid over-concentration in stocks, sectors and styles.

### Eliminates emotion

Rules for rebalancing and risk controls enforces buy low, sell high discipline.

### Delivers pure large cap exposure

Equal-weighting the S&P 100 maintains 100% exposure to large cap stocks.

### The S&P 500 is Dominated by the Largest Companies

- A handful of stocks dominate index performance.
- The top 25 holdings make up approximately 35% of the Index by weight.
- Equal weighting undervalued securities helps reduce over-concentration in high-priced securities.
- Results in improved diversification by individual stocks, economic sectors and style.

Source: Standard & Poor's, as of 12/31/17.

**Past performance does not guarantee future results.** Diversification does not guarantee a profit or protect against loss.

Apple's weight in terms of impact when utilizing a market-cap weighted approach is more than 15x the average company weight of the holdings in the S&P 500. The 0.2% represents the average company weight in the market-cap weighted S&P 500.

An investor should consider the investment objectives, risks, charges and expenses of the Fund(s) carefully before investing. ## Calendar Year Total Returns (%)

Class A and Class I Shares (without Sales Charge) as of December 31

The performance quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. The investment return and principal value of an investment in the Portfolio will fluctuate, so that your shares, when redeemed, may be worth more or less than their original cost. For performance information current to the most recent month-end, please visit [www.voyainvestments.com](http://www.voyainvestments.com). Returns for other share classes will vary due to different charges and expenses. Performance assumes reinvestment of distributions and does not account for taxes.

The Voya Corporate Leaders® 100 Fund discussed may be available to you as part of your employer sponsored retirement plan. There may be additional plan level fees resulting in personal performance to vary from stated performance. Please call your benefits office for more information.

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of the period and a sale at net asset value at the end of the period; and assumes reinvestment of dividends, capital gain distributions and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Net asset value equals total Fund assets net of Fund expenses such as operating costs and management fees. Total investment return at net asset value is not annualized for periods less than one year.

The S&P 500 is a product of S&P Dow Jones Indices LLC, a division of S&P Global, or its affiliates ("SPDJI"), and has been licensed for use by Voya. Standard & Poor's® and S&P® are registered trademarks of Standard & Poor's Financial Services LLC, a division of S&P Global ("S&P"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones"). Voya or its products or services are not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P or their respective affiliates, and none of such parties make any representation regarding the advisability of investing in such product(s) nor do they have any liability for any errors, omissions, or interruptions of the S&P 500.

**Investment Risks:** All investing involves risks of fluctuating prices and the uncertainties of rates of return and yield inherent in investing. Prices of **value-Oriented Securities** tend to correlate more closely with economic cycles than growth-oriented securities, they generally are more sensitive to changing economic conditions. Investing in stocks of **Small- and Mid-Sized Companies** may entail greater volatility and less liquidity than larger companies. The Fund may use **Derivatives**, such as options and futures, which can be illiquid, may disproportionately increase losses and have a potentially large impact on Fund performance. Because the Fund may invest in **Other Investment Companies**, you may pay a proportionate share of the expenses of that other investment company, in addition to the expenses of the Fund. A manager's proprietary investment model may not adequately allow for existing or unforeseen market factors or the interplay between such factors. Other risks of the Fund include but are not limited to: **Convertible Securities Risks; Market Trends Risks; Price Volatility Risks; and Securities Lending Risks. Investors should consult the Fund's Prospectus and Statement of Additional Information for a more detailed discussion of the Fund's risks.** The **S&P 500 Index** is an unmanaged index considered representative of the US stock market. Unmanaged index returns do not reflect any fees, expenses, or sales charges. **Investors cannot directly invest in an index.**

The Adviser has contractually agreed to limit expenses of the Fund. This expense limitation agreement excludes interest, taxes, investment-related costs, leverage expenses, and extraordinary expenses and may be subject to possible recoupment. Please see the Fund's prospectus for more information. The expense limits will continue through at least 2019-10-01. Expenses are being waived to the contractual cap.
