* Diversification does not ensure a profit or may not protect against loss in a declining market.

² The Adviser has contractually agreed to limit expenses of the Fund. This expense limitation agreement excludes interest, taxes, investment-related costs, leverage expenses, and extraordinary expenses and may be subject to possible recoupment. Please see the Fund's prospectus for more information. The expense limits will continue through at least 2019-08-01. The Fund is operating under the contractual expense limits.

³ Includes maximum 2.50% sales charge.

⁴ S&P/LSTA Leveraged Loan Index

⁵ Returns-Based Statistics are shown for Class I shares only based on 5-yr returns. For definitions, see Glossary of Terms.

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of the period and a sale at net asset value at the end of the period; and assumes reinvestment of dividends, capital gain distribution and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Net asset value equals total Fund assets net of Fund expenses such as operating costs and management fees. Total investment return at net asset value is not annualized for periods less than one year. Performance does not account for taxes. Returns for other share classes vary due to different charges and expenses.

Disclosures

⁴ The **S&P/LSTA Leveraged Loan Index** is an unmanaged total return index that captures accrued interest, repayments, and market value changes. The Index does not reflect fees, brokerage commissions, taxes or other expenses of investing. **Investors cannot directly invest in an index.**

The S&P/LSTA Leveraged Loan Index is a product of S&P Dow Jones Indices LLC, a division of S&P Global, or its affiliates ("SPDJ"), and has been licensed for use by Voya. Standard & Poor's® and S&P® are registered trademarks of Standard & Poor's Financial Services LLC, a division of S&P Global ("S&P"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones"). Voya or its products or services are not sponsored, endorsed, sold or promoted by SPDJ, Dow Jones, S&P or their respective affiliates, and none of such parties make any representation regarding the advisability of investing in such product(s) nor do they have any liability for any errors, omissions, or interruptions of the S&P/LSTA Leveraged Loan Index.

⁶ The Standard & Poor's rating scale is as follows, from excellent (high grade) to poor (including default): AAA to D, with intermediate ratings offered at each level between AA and CCC. Anything lower than a BBB-rating is considered a non investment grade or junk bond. Any security that is not rated by Standard & Poor's is placed in the NR (Not Rated) category.

The strategy discussed may be available to you as part of your employer sponsored retirement plan. There may be additional plan level fees resulting in personal performance that varies from stated performance. Please call your benefits office for more information.

Investment Risks: The Fund invests primarily in below investment grade, floating rate senior loans (also known as "high yield" or "junk" instruments), which are subject to greater levels of liquidity, credit, and other risks than are investment grade instruments. There is a limited secondary market for floating rate loans, which may limit the Fund's ability to sell a loan in a timely fashion or at a favorable price. If a loan is illiquid, the value of the loan may be negatively impacted and the

manager may not be able to sell the loan in order to meet redemption needs or other portfolio cash requirements. The value of loans in the Fund could be negatively impacted by adverse economic or market conditions and by the failure of borrowers to repay principal or interest. A decrease in demand for loans may adversely affect the value of the Fund's investments, causing the Fund's net asset value to fall. Because of the limited market for floating rate senior loans, it may be difficult to value loans in the Fund on a daily basis. The actual price the Fund receives upon the sale of a loan could differ significantly from the value assigned to it in the Fund. The Fund may invest in foreign instruments, which may present increased market, liquidity, currency, interest rate, political, information, and other risks. These risks may be greater in the case of emerging market loans. Although interest rates for floating rate senior loans typically reset periodically, changes in market interest rates may impact the valuation of loans in the portfolio. In the case of early prepayment of loans in the Fund, the Fund may realize proceeds from the repayment that are less than the valuation assigned to the loan by the Fund. In the case of extensions of payment periods by borrowers on loans in the Fund, the valuation of the loans may be reduced. The Fund may also invest in other investment companies and will pay a proportional share of the expenses of the other investment company. Other risks of the Fund include but are not limited to: Borrowings; Diversification Risks; and Concentration Risks. Investors should consult the Fund's Prospectus and Statement of Additional Information for a more detailed discussion of the Fund's risk.

Glossary of Terms: **Alpha** Measures the difference between a fund's actual return and its level of risk as measured by beta. An alpha of 0.5 implies the fund performed 0.5% better than the market would predict. The figure is calculated on a three-year basis relative to the benchmark. **Beta** Measures the Fund's volatility relative to the overall market. A beta above 1 is more volatile than the overall market, while a beta below 1 is less volatile. **R²** The way in which a percentage of a portfolio's total returns represents the portfolio's beta measure. **Sharpe Ratio** A risk-adjusted measure calculated using standard deviation and excess

return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance.

Standard Deviation A measure of the degree to which an individual probability value varies from the distribution mean. The higher the number, the greater the risk. **Weighted Average Market Price** is calculated as the market price of each loan divided by the par amount outstanding. **Weighted Average Maturity** is the weighted average years until maturity on all senior loans. **Weighted Average Rating Factor** is a measure that is used by credit rating companies to determine the credit quality of a portfolio. **Weighted Average Reset** measures the average number of days that the current interest rate contracts are in effect. This measure allows rating companies to look at a portfolio as a single security, and assign it a single rating.

The Morningstar Analyst Rating™ is not a credit or risk rating. It is a subjective evaluation performed by the manager research analysts of Morningstar. Morningstar evaluates funds based on five key pillars, which are process, performance, people, parent, and price. Analysts use this five pillar evaluation to determine how they believe funds are likely to perform over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weighting of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflect an Analyst's conviction in a fund's prospects for outperformance. Analyst Ratings are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to <http://corporate1.morningstar.com/AnalystRating/> **The Morningstar Analyst Rating should not be used as the sole basis in evaluating a mutual fund. Morningstar Analyst Ratings involve unknown risks and uncertainties which may cause Morningstar's expectations not to occur or to differ significantly from what we expected.**

26-50	Second Quartile
51-75	Third Quartile
76-100	Bottom Quartile

Fi360 Fiduciary Score®

The **Fi360 Fiduciary Score®** is a peer percentile ranking of an investment against a set of quantitative due diligence criteria indicative of prudent fiduciary management. Each investment is evaluated against nine individual factors and thresholds, with points allotted if it fails a particular criterion. Investments with 0 points are automatically given an **Fi360 Fiduciary Score®** of 0. Every other investment is given a Score of 1–100 representing their percentile ranking. The lower the Score, the better. The Fi360 Fiduciary Score® should not be used as the sole source of information in an investment decision. Visit Fi360.com/Fi360-Fiduciary-Score for the complete methodology document.
