

Voya GNMA Income Fund

Class A:
LEXNX

Class C:
LEGNX

Class I:
LEINX

Class W:
IGMWX

Best GNMA Fund over Three Years

Ranked #1 (Class I) out of 16 eligible funds based on risk-adjusted performance as of 11/30/17.

△ See back page for additional information.

30 Year Legacy of GNMA Investing with Solid Long-Term Results

One of the oldest funds to invest in GNMA's, historically the highest yielding security backed by the U.S. government, that may serve as an effective diversification tool to help manage overall portfolio risk.

High quality mortgage securities

Typically invests 85-90% of assets in GNMA securities, managed by a specialized and dedicated team focused on the agency mortgage markets.

Nimble investment process aims for steadier long-term performance

Conservative strategy seeks to stay ahead of risk trends to produce consistent results through all environments.

A portfolio diversifier for all markets

GNMA's have demonstrated low, long-term correlations with equities and more volatile income-oriented asset classes.

Voya GNMA Income Fund Calendar Year Returns 30 years ending 12/31/17

This combination of solid income and relative price stability has resulted in the Fund delivering consistently positive total returns in every calendar year but two since 1988.

Source: Morningstar®, Inc. Class A annual returns are for the year ended December 31 of each year. Returns do not reflect sales charges and would be lower if they did.

The performance quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. The investment return and principal value of an investment in the Portfolio will fluctuate, so that your shares, when redeemed, may be worth more or less than their original cost. For performance information current to the most recent month-end, please visit www.voyainvestments.com.

The Adviser has contractually agreed to limit expenses of the Fund. This expense limitation agreement excludes interest, taxes, investment-related costs, leverage expenses, and extraordinary expenses and may be subject to possible recoupment. Please see the Fund's prospectus for more information. The expense limits will continue through at least 2019-08-01. The Fund is operating under the contractual expense limits.

⁴The Lipper Fund Awards program honors funds that have excelled in delivering consistently strong risk-adjusted performance, relative to peers. Classification averages are calculated with all eligible share classes for each eligible classification. The highest Lipper Leader for Consistent Return (Effective Return) value within each eligible classification determines the fund classification winner over three, five, or ten years. For a detailed explanation please review the Lipper Leaders methodology document at www.lipperweb.com. From Thomson Reuters Lipper Awards, © 2018 Thomson Reuters. All rights reserved. The performance quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. The investment return and principal value of an investment in the Portfolio will fluctuate, so that your shares, when redeemed, may be worth more or less than their original cost. For performance information current to the most recent month-end, please visit www.voyainvestments.com. Returns for other share classes will vary due to different charges and expenses. Performance assumes reinvestment of distributions and does not account for taxes.

The Voya GNMA Income Fund discussed may be available to you as part of your employer sponsored retirement plan. There may be additional plan level fees resulting in personal performance to vary from stated performance. Please call your benefits office for more information.

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of the period and a sale at net asset value at the end of the period; and assumes reinvestment of dividends, capital gain distributions and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Net asset value equals total Fund assets net of Fund expenses such as operating costs and management fees. Total investment return at net asset value is not annualized for periods less than one year.

Investment Risks: All investing involves risks of fluctuating prices and the uncertainties of rates of return and yield inherent in investing. As **Interest Rates** rise, bond prices fall, reducing the value of the Fund's share price. To the extent that the Fund invests in asset-backed, **Mortgage-Backed** or **Mortgage-Related Securities**, its exposure to prepayment and extension risks may be greater than investments in other fixed-income securities. While the Fund invests in securities guaranteed by the U.S. Government as to timely payments of interest and principal, the Fund shares are **Not Insured** or **Guaranteed**. Other risks of the Fund include but are not limited to: **Credit Risks; Extension Risks; Other Investment Companies' Risks; Prepayment Risks; U.S. Government Securities and Obligations Risks; and Securities Lending Risks. Investors should consult the Fund's Prospectus and Statement of Additional Information for a more detailed discussion of the Fund's risks.** The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. ©2018 Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

The **Bloomberg Barclays U.S. GNMA Index** is an unmanaged index covering mortgage-backed pass-through securities of the Government National Mortgage Association (GNMA). The Index does not reflect fees, brokerage commissions, taxes or other expenses of investing. **Investors cannot directly invest in an index.**

Credit Quality, AAA is the highest grade (best) to D which is the lowest (worst) is calculated based on S&P, Moody's, and Fitch agency ratings. If the ratings from all 3 rating agencies are available, securities will be assigned the Median rating. If the ratings are available from only two of the agencies, the more conservative of the ratings will be assigned to the security. If the rating is available from only one agency, then that rating will be used. Any security that is not rated is placed in the NR (Not Rated) category. Ratings do not apply to the Fund itself or to the Fund shares. Ratings are subject to change.

Information Ratio measures the returns above the returns of a benchmark to the volatility of those returns. **Duration** The weighted measure of the length of time the bond will pay out. Unlike maturity, duration takes into account interest payments that occur throughout the course of holding the bond. Basically, duration is a weighted average of the maturity of all the income streams from a bond or portfolio of bonds. **SEC 30-Day Discounted Yield (%)** – A standardized yield calculation created by the SEC, it reflects the income earned during a 30-day period, after the deduction of the fund's net expenses (net of any expense waivers or reimbursements). **SEC 30-Day Unsubsidized Yield (%)** – A standardized yield calculation created by the SEC, it reflects the income earned during a 30-day period, after the deduction of the fund's gross expenses. Negative 30-Day SEC Yield results when accrued expenses of the past 30 days exceed the income collected during the past 30 days. **Standard Deviation** A measure of the degree to which an individual probability value varies from the distribution mean. The higher the number, the greater the risk.
