Voya Short Term Bond Fund Performance (%) as of 09/30/18

Class A Shares Average Annual Total Returns (Performance may vary for other share classes)

| | QTR | YTD | 1 Year | 3 Years | 5 Years | Since Inception 12/19/12 | Expense Ratio [†] | |
|--|-------|-------|--------|---------|---------|--------------------------|----------------------------|-------|
| At Net Asset Value | 0.50 | 0.32 | 0.22 | 0.91 | 1.05 | 0.98 | Gross | 0.88% |
| Class A With Sales Charge [†] | -2.02 | -2.17 | -2.26 | 0.08 | 0.53 | 0.53 | Net | 0.81% |
| Bloomberg Barclays U.S. G/C 1-3 Yr Index | 0.33 | 0.41 | 0.20 | 0.73 | 0.83 | 0.81 | | |

[†]Includes maximum 2.50% sales charge.

[†]The Adviser has contractually agreed to limit expenses of the Fund. This expense limitation agreement excludes interest, taxes, investment-related costs, leverage expenses, and extraordinary expenses and may be subject to possible recoupment. Please see the Fund's prospectus for more information. The expense limits will continue through at least 2019-08-01. Expenses are being waived to the contractual cap.

Calendar Year Total Returns (%)

Class A Shares (without Sales Charge) as of December 31

The performance quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. The investment return and principal value of an investment in the Portfolio will fluctuate, so that your shares, when redeemed, may be worth more or less than their original cost. For performance information current to the most recent month-end, please visit www.voyainvestments.com. Returns for other share classes will vary due to different charges and expenses. Performance assumes reinvestment of distributions and does not account for taxes.

The Voya Short Term Bond Fund discussed may be available to you as part of your employer sponsored retirement plan. There may be additional plan level fees resulting in personal performance to vary from stated performance. Please call your benefits office for more information.

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of the period and a sale at net asset value at the end of the period; and assumes reinvestment of dividends, capital gain distributions and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Net asset value equals total Fund assets net of Fund expenses such as operating costs and management fees. Total investment return at net asset value is not annualized for periods less than one year.

The **Bloomberg Barclays U.S. G/C 1-3 Yr index** covers treasuries, agencies, publicly issued U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity, and quality requirements. For comparison purposes, the index is fully invested, which includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs. **Investors cannot directly invest in an index.**

Not FDIC Insured | May Lose Value | No Bank Guarantee

An investor should consider the investment objectives, risks, charges and expenses of the Fund(s) carefully before investing. For a free copy of the Fund's prospectus, or summary prospectus, which contains this and other information, visit us at www.voyainvestments.com or call (800) 992-0190. Please read the prospectus carefully before investing.

INVESTMENT MANAGEMENT

Reliable Partner | Reliable Investing[®]

VOYA[®]

Voya Short Term Bond Fund

Growth of \$10,000 Investment

Class A Shares (without Sales Charge) | Period from Inception through 09/30/18

The performance quoted in the "Growth of \$10,000 Investment" chart represents past performance. Performance shown is without sales charges; had sales charges been deducted, performance would have been less. Ending value includes reinvestment of distributions.

Voya Investment Management ("Voya IM")

Voya Investment Management (Voya IM) is a leading active asset management firm. Drawing on over 40 years of experience and an ongoing commitment to reliable investing, Voya IM has the resources and expertise to help long-term investors achieve strong investment results.

Investment Risks:

All investing involves risks of fluctuating prices and the uncertainties of rates of return and yield inherent in investing. **Foreign Investing** does pose special risks including currency fluctuation, economic and political risks not found in investments that are solely domestic. The Fund may use **Derivatives**, such as options and futures, which can be illiquid, may disproportionately increase losses and have a potentially large impact on Fund performance. The Fund is subject to both **Credit** and **Interest Rate Risk**. The Fund's share price and yield will be affected by interest rate movements, with bond prices generally moving in the opposite direction from interest rates. **Credit Risk** refers to the bond issuers and senior loan issuers ability to make timely payments of principal and interest. High-Yield Securities, or junk bonds, are rated lower than investment-grade bonds because there is a greater possibility that the issuer may be unable to make interest and principal payments on those securities. To the extent that the Fund invests in **Mortgage-Related Securities**, its exposure to prepayment and extension risks may be greater than investments in other fixed-income securities. **Other risks of the Fund include but are not limited to: Company; Credit Default Swaps; Currency; Investment Model; Market; Market Capitalization; Municipal Obligations; Other Investment Companies; Price Volatility; Prepayment and Extension; Securities Lending; Sovereign Debt and U.S. Government Securities and Obligations Risks.** Investors should consult the Fund's Prospectus and Statement of Additional Information for a more detailed discussion of the Fund's risks.

Glossary of Terms:

Alpha Measures the difference between a fund's actual return and its level of risk as measured by beta. An alpha of 0.5 implies the fund performed 0.5% better than the market would predict. The figure is calculated on a three-year basis relative to the benchmark. **Beta** Measures the Fund's volatility relative to the overall market. A beta above 1 is more volatile than the overall market, while a beta below 1 is less volatile. **Duration** The weighted measure of the length of time the bond will pay out. Unlike maturity, duration takes into account interest payments that occur throughout the course of holding the bond. Basically, duration is a weighted average of the maturity of all the income streams from a bond or portfolio of bonds. **Information Ratio** measures the returns above the returns of a benchmark to the volatility of those returns. **R²** The way in which a percentage of a portfolio's total returns represents the portfolio's beta measure. **SEC 30-Day Subsidized Yield (%)** – A standardized yield calculation created by the SEC, it reflects the income earned during a 30-day period, after the deduction of the fund's net expenses (net of any expense waivers or reimbursements). **SEC 30-Day Unsubsidized Yield (%)** – A standardized yield calculation created by the SEC, it reflects the income earned during a 30-day period, after the deduction of the fund's gross expenses. Negative 30-Day SEC Yield results when accrued expenses of the past 30 days exceed the income collected during the past 30 days. **Sharpe Ratio** A risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance. **Standard Deviation** A measure of the degree to which an individual probability value varies from the distribution mean. The higher the number, the greater the risk. **Weighted Average Life Years** The length of time until the average security in a fund will mature or be redeemed by its issuer. It indicates a fund's sensitivity to interest rate changes: longer average weighted maturity implies greater volatility in response to interest rate changes.

Credit Quality, AAA is the highest grade (best) to D which is the lowest (worst) is calculated based on S&P, Moody's, and Fitch agency ratings. If the ratings from all 3 rating agencies are available, securities will be assigned the Median rating. If the ratings are available from only two of the agencies, the more conservative of the ratings will be assigned to the security. If the rating is available from only one agency, then that rating will be used. Ratings do not apply to the Fund itself or to the Fund shares. Ratings are subject to change.
