Pursuing Consistent Income

Investor highlights

An adaptable approach to today's changing markets.

- 1 Globally diversified¹
- 2 Level monthly payments
- 3 Income today or tomorrow

¹ Diversification does not ensure a profit or protect against loss in a declining market.

In today's environment of evolving market cycles, finding sources of consistent income can be daunting. While there are many options, each come with their own advantages and drawbacks. Some can produce predictable monthly payments while others can offer growth potential and daily liquidity should circumstances change. Yet few, if any, can offer all three. Meanwhile, most income investments tend to focus on a narrow range of asset classes and factors, leading to less overall portfolio diversification than many investors may even realize.

The Voya Global Diversified Payment Fund Can Help Investors Achieve Consistent Income Across All Market Environments

- ✔ Predictable Monthly Payments
- ✔ Growth Potential
- ✔ Daily Liquidity
- ✔ Globally Diversified

Voya's Global Diversified Payment Fund balances competing needs providing consistent monthly payments, daily liquidity and global diversification to help provide income today or tomorrow.

An investor should consider the investment objectives, risks, charges and expenses of the Fund(s) carefully before investing. Please read the prospectus carefully before investing.

The Voya Global Diversified Payment Fund strives to provide steady monthly payments to help investors meet their income needs.

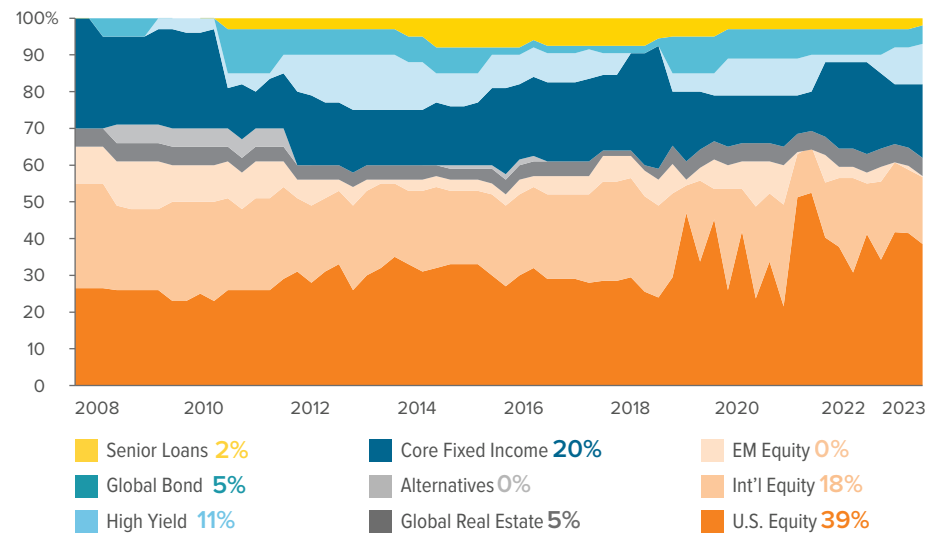

1 Globally diversified²

The Fund has the flexibility to allocate across global capital markets to:

- Support the fixed monthly payment.
- Pursue capital appreciation while managing risk.

Delivered Consistent Payments Despite Economic Uncertainty

Fund Per-Share Payment History (Class I, 07/01/08 – 12/31/23)

³ Fund inception 07/01/08.

All payments per share are annualized figures for Class I. For example, in 2008, six monthly distributions were made totaling \$0.31. Source: Voya Investment Management. **Past performance does not guarantee future results.** The annual payment rate is determined from within the total range of 3.25% to 6.75% per annum depending on share class. Special distributions made by the Fund, including special capital gains distributions, if any, that are normally paid in December, are not factored into the Fund's targeted managed payment amounts and will be automatically reinvested in additional Fund shares, unless a shareholder elects to receive the special distribution in cash.

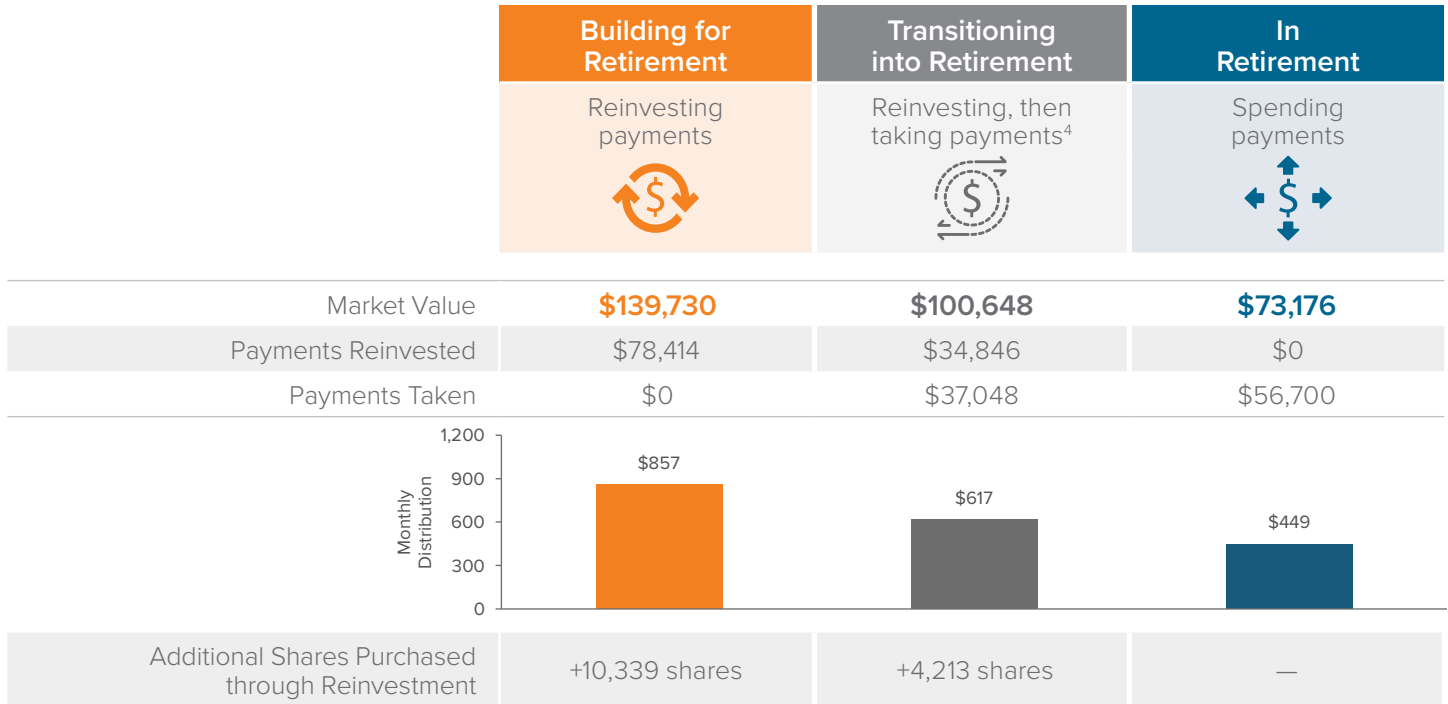

² Diversification does not ensure a profit or protect against loss in a declining market.

3 Income today or tomorrow

Whether planning for, approaching, or enjoying retirement, investors have the flexibility to take or reinvest each monthly payment.

⁵ The Adviser has contractually agreed to limit expenses of the Fund. This expense limitation agreement excludes interest, taxes, investment-related costs, leverage expenses, and extraordinary expenses and may be subject to possible recoupment. Please see the Fund's prospectus for more information. The expense limits will continue through at least 2024-03-01. Expenses are being waived to the contractual cap. The Fund's Acquired (Underlying) Funds Fees and Expenses are based on a weighted average of the fees and expenses of the Underlying Funds in which it invests. The amount of fees and expenses of the Underlying Funds borne by the Fund will vary based on the Fund's allocation of assets to, and annualized net expenses of, the particular Underlying Funds during the Fund's fiscal year.

⁶ Includes maximum 5.75% sales charge.

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of the period and a sale at net asset value at the end of the period; and assumes reinvestment of dividends, capital gain distributions and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Net asset value equals total Fund assets net of Fund expenses such as operating costs and management fees. Total investment return at net asset value is not annualized for periods less than one year. Performance does not account for taxes. Returns for the other share classes vary due to different charges and expenses.

The performance quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. The investment return and principal value of an investment in the portfolio will fluctuate, so that your shares, when redeemed, may be worth more or less than their original cost. The **S&P Target Risk Moderate Index** is a broad-based index that seeks to measure the performance of an asset allocation strategy targeted to a moderate-focused risk profile. The index is fully investable, with varying levels of exposure to equities and fixed income through a family of exchange-traded funds. The index offers increased exposure to fixed income, while also increasing opportunities for higher returns through equity. The index returns include the reinvestment of dividends and distributions net of withholding taxes, but do not reflect fees, brokerage commissions, or other expenses.

The S&P Target Risk Moderate Index is a product of S&P Dow Jones Indices LLC, a division of S&P Global, or its affiliates ("SPDJI"), and has been licensed for use by Voya. Investment Risks

All investing involves risks of fluctuating prices and the uncertainties of rates of return and yield inherent in investing. You could lose money on your investment and any of the following risks, among others, could affect investment performance. The following principal risks are presented in alphabetical order which does not imply order of importance or likelihood: Affiliated Underlying Funds; Asset Allocation; Commodities; Company; Credit; Credit Default Swaps; Currency; Derivative Instruments; Environmental, Social, and Governance (Funds-of-Funds); Floating Rate Loans; Foreign (Non-U.S.) Investments/ Developing and Emerging Markets; Growth Investing; High-Yield Securities; Index Strategy (Funds-of-Funds); Interest in Loans; Interest Rate; Investment Model; Liquidity; Managed Payment; Market; Market Capitalization; Market Disruption and Geopolitical; Prepayment and Extension; Real Estate Companies and Real Estate Investment Trusts; Underlying Funds; Value Investing. **Investors should consult the Fund's Prospectus and Statement of Additional Information for a more detailed discussion of the Fund's risks.** Risks specific to Managed Payment: The Fund is expected to make monthly payments under its Managed Payment Policy regardless of the Fund's investment performance. Because these payments will be made from Fund assets, the Fund's monthly payments may reduce the amount of assets available for investment by the Fund. It is possible for the Fund to suffer substantial investment losses and simultaneously experience additional asset reductions as a result of its payments to shareholders under the Managed Payment Policy. The Fund may, under its Managed Payment Policy, return capital to shareholders which will decrease their costs basis in the Fund and will affect the amount of any capital gain or loss that shareholders realize when selling or exchanging their Fund shares.
