

# Enhance Your Portfolio Diversification in Uncertain Markets

## Investor highlights

A diversified strategy for multiple market cycles:

- 1 Focus on mitigating downside
- 2 Experienced and skilled team

Considering high yield bonds as a core part of your equity portfolio could potentially offer lower volatility while providing returns similar to equity securities. Both asset classes are leveraged to the business cycle – prices tending to rise and fall with economic momentum.

In a rising market, equity prices are supportive of high yield bond prices, as they serve to increase the equity cushion below the bonds. When markets decline, however, the bond component of high yield bonds kicks in as their regular interest payments serve to dampen the volatility of their returns.

### Adding High Yield to an Asset Allocation Portfolio Produced Better Risk-Adjusted Returns Over the Past 20 Years

Source: Morningstar. As of 03/31/24. Date represents average 3-year rolling performance for the 20-year period. The 50%/40%/10% Blend is defined by a portfolio of 50% of the S&P 500 Index, 40% of the BBg U.S. Agg Bond Index and 10% of the BBg U.S. Corporate High Yield Index. The 60%/40% Blend is defined by a portfolio of 60% of the S&P 500 Index and 40% of the BBg U.S. Agg Bond Index. **Past performance does not guarantee future results.** Investors cannot directly invest in an index.

An investor should consider the investment objectives, risks, charges and expenses of the Fund(s) carefully before investing. For a free copy of the Fund's prospectus, or summary prospectus, which contains this and other information, visit [www.voyainvestments.com](http://www.voyainvestments.com) or call (800) 992-0180. Please read the prospectus carefully before investing.

We believe that rigorous credit research, a keen awareness of economic and credit cycles, and security selection are critical to identifying superior investment opportunities and managing downside risk.

## 1 Focus on mitigating downside

**Down capture ratio** is a returns-based depiction based on how well the portfolio performs relative to its benchmark during periods of negative (“down”) performance for the benchmark on a percentage basis.

The Voya high yield portfolio construction process balances risk and return drivers to help navigate multiple market environments. The Fund is focused on mitigating the downside by limiting company specific risks and avoiding overconcentrated positions.

### Down Market Capture

10-year period

<sup>1</sup> The Adviser has contractually agreed to limit expenses of the Fund. This expense limitation agreement excludes interest, taxes, investment-related costs, leverage expenses and extraordinary expenses, and may be subject to possible recoupment. Please see the Fund's prospectus for more information. The expense limits will continue through at least August 1, 2024. The Fund is operating under the contractual expense limits.

<sup>2</sup> Includes maximum 2.50% sales charge.

**The performance quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. The investment return and principal value of an investment in the portfolio will fluctuate, so that your shares, when redeemed, may be worth more or less than their original cost. For performance information current to the most recent month-end, please visit, [www.voyainvestments.com](http://www.voyainvestments.com).**

Total investment return at net asset value has been calculated assuming a purchase at net asset value at the beginning of the period and a sale at net asset value at the end of the period; and assumes reinvestment of dividends, capital gain distributions and return of capital distributions/allocations, if any, in accordance with the provisions of the dividend reinvestment plan. Net asset value equals total Fund assets net of Fund expenses such as operating costs and management fees. Total investment return at net asset value is not annualized for periods less than one year. Performance does not account for taxes. Returns for the other share classes vary due to different charges and expenses.

## Voya Fixed Income: Effective Solutions.

### Sector-Level Centers of Excellence

- Supported by independent risk management team

### Rigorous Portfolio Construction

#### Disclosures

The **Bloomberg U.S. High Yield 2% Issuer Cap Index** is an unmanaged index comprised of fixed rate, non-investment grade debt securities that are dollar denominated and non-convertible. The index limits the maximum exposure to any one issuer to 2%. The Index does not reflect fees, brokerage commissions, taxes or other expenses of investing. The **Bloomberg U.S. Aggregate Bond Index** is a widely recognized, unmanaged index of publicly issued investment grade U.S. Government, mortgage-backed, asset-backed and corporate debt securities. The **Standard and Poor's 500 Index** is an unmanaged capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Bloomberg does not approve or endorse this material, nor guarantee the accuracy or completeness of any information herein, nor make any warranty, express or implied, as to the results to be obtained therefrom and, to the maximum extent allowed by law, shall not have any liability or responsibility for injury or damages arising in connection therewith. **Investors cannot directly invest in an index.**

The strategy discussed may be available to you as part of your employer sponsored retirement plan. There may be additional plan level fees resulting in personal performance that varies from state performance. Please call your benefits office for more information.

**Investment Risks:** All investing involves risks of fluctuating prices and the uncertainties of rates of return and yield inherent in investing. **High-Yield Securities**, or "junk bonds", are rated lower than investment-grade bonds because there is a greater possibility that the issuer may be unable to make interest and principal payments on those securities. The Fund may use **Derivatives**, such as options and futures, which can be illiquid, may disproportionately increase losses and have a potentially large impact on Fund performance. **Foreign Investing** does pose special risks including currency fluctuation, economic and political risks not found in investments that are solely domestic. Risks of foreign investing are generally intensified in **Emerging Markets**. As **Interest Rates** rise, bond prices may fall, reducing the value of the Fund's share price. **Debt Securities** with longer durations tend to be more sensitive to interest rate changes. Other risks of the Fund include but are not limited to: **Credit Risks; Other Investment Companies' Risks; Price Volatility Risks; Inability to Sell Securities Risks; and Securities Lending Risks.** Investors should consult the Fund's Prospectus and Statement of Additional Information for a more detailed discussion of the Fund's risks.
