Strategy overview

The Voya Enhanced Yield Fixed Income strategy seeks to maximize total return via a higher credit quality approach expressed through the use of Treasury, Agency, and Corporate Credit securities, both Investment Grade and Below, with 1-10 year maturities. The strategy targets greater income than pure investment grade while preserving principle by adding selective high yield bond exposure.

Investment philosophy

We believe that intensive security level research paired with a broadly informed awareness of the economic and credit cycles are critical to identifying superior investment opportunities and managing downside risk.

The following key beliefs underpin our investment philosophy:

- Security selection is a significant driver of risk and returns
- Nimble sector and sub-sector allocations capture relative value
- Risk management is critical throughout the entire investment process

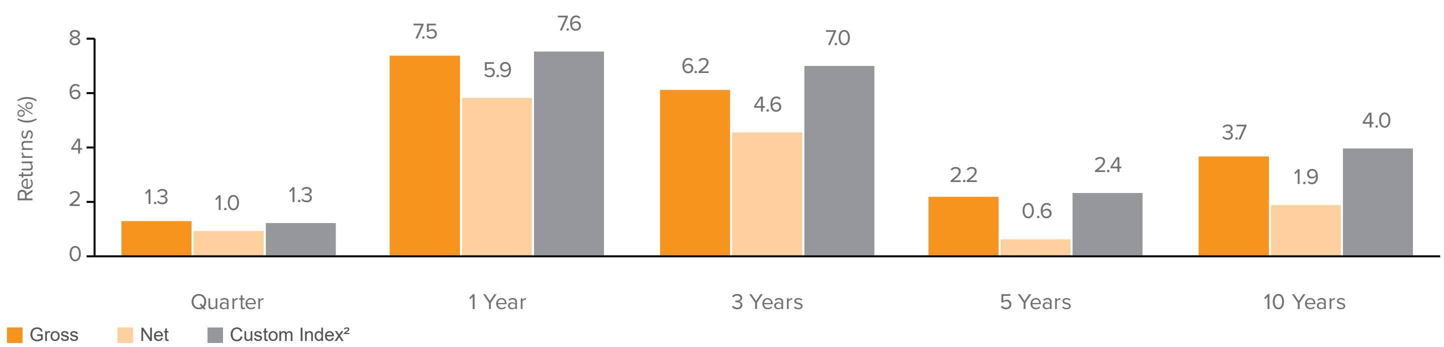
These three key beliefs frame an integrated strategy that incorporates a dynamic blend of top-down and bottom-up approaches.

Investment process

Supported by a seasoned team of fixed income professionals, our three-step process leverages the collective insights from across Voya's Fixed Income platform, incorporating both top-down and bottom-up research insights. First, the Investment Committee establishes the macro view and assesses the current risk regime. This assessment includes an estimate of "achievable alpha", which in turn influences the team's recommended risk posture. Next, the Multi-Sector Portfolio Management team discusses the investment themes and target risk profile to construct a model portfolio incorporating the strategy's guidelines and objectives. Finally, individual sector teams are then responsible for identifying and trading specific bonds.

Performance

Voya Enhanced Yield Fixed Income SMA



Voya Investment Management claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. **To learn more on the GIPS® compliance Schedule of Composite Performance go to: https://institutional.voya.com/document/product/gips.pptx.**

Past performance does not guarantee future results. "Gross Returns" are presented before the deduction of transaction costs and should be used as Supplemental Information only. "Net Returns" are calculated by subtracting a hypothetical maximum total wrap fee (estimated at 1.50% per annum) from the monthly "pure" gross-of-fee returns. For periods from January 2007 to June 2021 the hypothetical maximum fee was 2.00% per annum. The total wrap fee includes transaction costs, portfolio management, investment advisory, custodial and other administrative costs. Wrap fees vary amongst brokerage firms and may be negotiated based on account size and other factors. The hypothetical maximum total wrap fee used is deemed to be the maximum fee charged to any composite account but we cannot guarantee accuracy. More information about fees can be found in the Form ADV Part II of Voya Investment Management Co.

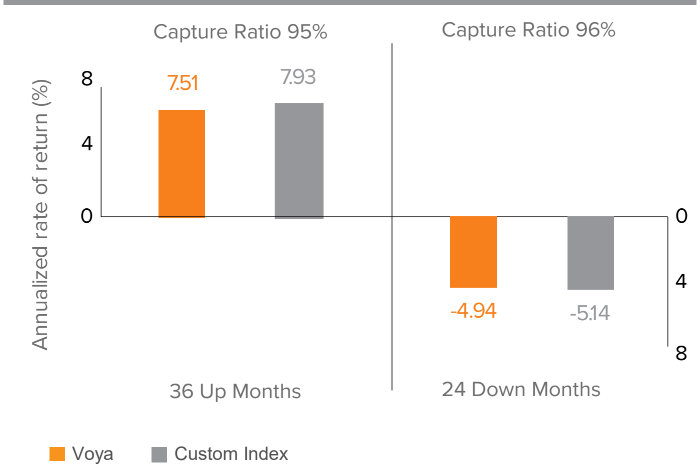
Up / Down Capture Ratio (5 years ending 12/31/25)



[2] Please see last page for the benchmark definition.

Credit quality is generally based on third-party agency ratings, ranging from AAA (highest) to D (lowest). If ratings are available from each of S&P, Moody's and Fitch, the security is assigned the median rating. If ratings are available from only two of these agencies, the lower rating is assigned. If a rating is available from only one of these three agencies, then that rating is used. If ratings are not available from any of these three agencies, then we may either assign the security an internal rating or mark it as Not Rated (NR). Ratings may not accurately reflect risk and are subject to change.

Past performance does not guarantee future results. The returns-based characteristics presented are based on the gross-of-fee composite returns. Characteristics are based on a representative account in the composite that we believe best represents the portfolio management style of the composite. Characteristics may be adjusted to exclude securities for which data is not available or for extreme data outliers via commonly used trimming methodologies. Holdings are subject to change. The information shown is supplemental only. Totals may not equal due to rounding.

Voya Investment Management

Voya Investment Management delivers actively managed public and private market solutions that drive differentiated outcomes for clients worldwide. Our team of 300+ investment professionals manages $365 billion* in assets. We excel at partnering with clients to understand their needs and address challenges in innovative ways, drawing on extensive expertise across fixed income, equity, and multi-asset strategies.

*As of 09/30/25. Voya IM assets of $366 billion, as reported in Voya Financial SEC filings, represent revenue generating assets for which Voya Investment Management LLC and the registered investment advisers it wholly owns has full discretionary investment management responsibility. Voya IM assets of $365 billion are calculated on a market value basis for all accounts.

The principal risks are generally those attributable to bond investing. Holdings are subject to market, issuer, credit, prepayment, extension, and other risks, and their values may fluctuate. Market risk is the risk that securities may decline in value due to factors affecting the securities markets or particular industries. Issuer risk is the risk that the value of a security may decline for reasons specific to the issuer, such as changes in its financial condition. The strategy may invest in mortgage-related securities, which can be paid off early if the borrowers on the underlying mortgages pay off their mortgages sooner than scheduled. If interest rates are falling, the strategy will be forced to reinvest this money at lower yields. Conversely, if interest rates are rising, the expected principal payments will slow, thereby locking in the coupon rate at below market levels and extending the security's life and duration while reducing its market value. High yield bonds carry particular market risks and may experience greater volatility in market value than investment grade bonds. Foreign investments could be riskier than U.S. investments because of exchange rate, political, economics, liquidity, and regulatory risks. Additionally, investments in emerging market countries are riskier than other foreign investments because the political and economic systems in emerging market countries are less stable.

Returns are benchmarked to a customized blend of 60% Bloomberg Intermediate Gov/Credit Index and 40% Bank of America US High Yield Master II Constrained Index, rebalanced on a monthly basis, which does not incur management fees, transaction costs, or other expenses associated with a composite portfolio. Securities prices used to value the benchmark index for the purposes of calculating total return may or may not differ significantly from those used to value securities held within composite portfolios.
